

## OACM Handbook Updates 2022

The most significant changes to the Handbook this year are the revisions to Appendices F and I.

Appendix F is the section that describes Screening Requirements. With consultation from the Bishop's Office, the updates reflect changes that follow the current Diocesan Screening directives. Since these are under review, we anticipate further changes ahead, once the Diocese finishes defining their process.

Appendix I deals with the Nominating Committee. The majority of changes here were a general clean up of terminology and making the descriptions more current.

Some of the Position Descriptions in Appendix J were updated, however there is still work to be done in this area.

We are pleased with the work that has been done so far, and plan to continue to work on improving the document in the next couple of years.
